

Introduction to Software Analysis and Testing

Announcements

- Complete “Getting to know you” questionnaire.
- Read the syllabus.
- Read the handout in Moodle and answer the pre-class questions under RQ0.

Getting to know you

Please respond to the following prompts. (I will not share your responses with anyone else)

Questions (10 min)

Start time:

1. What is your name?

2. How do you like to be called?

3. What are your pronouns?

4. What is something you’d like the class to know about your life at Colgate?

5. What is something you’d like the class to know about your life outside of Colgate?

6. What kind of testing tools or techniques have you used prior to this course? (for example, prints, asserts, doctests, or other unit testing framework)

7. At what point in the code development process and why do you think about testing? (for example, because it’s required by the assignment)
